

REHEARSAL LOG

Activity 06 — Dramatised presentation · Day 3

Bitácora de ensayo

Team / Equipo	Entre Estrellas
Date / Fecha	2026-09-18
Members present / Presentes	María, Sofía, Lucía, Carlos, Mateo
Audience team / Equipo evaluador	Team CodeAlpha
Total run time / Tiempo total	9:45
Script version / Versión del guion	v2

1. Scene timing

SCENE	TARGET	MEASURED	DECISION TAKEN
1 — The complaint	1:30	1:25	Keep pace, good energy.
2 — The diagnosis	2:00	1:50	Clarify pronunciation of technical terms.
3 — The proposal	1:30	1:35	Slightly trim negotiation pauses.
4 — The window	2:00	1:55	Maintain dramatic tension during backup.
5 — The handover	1:30	1:20	Emphasize the before/after numbers clearly.
6 — The commitment	1:30	1:20	Smooth out closing transition.
Demo and questions	2:00	1:40	Ensure sandbox data loads instantly.

2. Pronunciation work

WORD OR LINE	WHO	WHAT WAS CORRECTED	SOLVED? (YES / STILL PRACTISING)
Maintenance	Lucía	Shifted stress to the first syllable (MÉIN-te-nans)	Yes
Database	Carlos	Avoided Spanish vowel sound, used (DÉI-ta-beis)	Yes
Concurrency peak	Carlos	Practiced consonant cluster fluency	Yes
Non-clustered index	Mateo	Slowed down multi-syllable delivery	Yes
Rollback plan	Lucía	Linked sound from roll to back	Still practising

3. Peer feedback

QUESTION	WHAT THE AUDIENCE TEAM ANSWERED	WHAT WE WILL CHANGE
1 · The client's problem in one sentence	The POS system froze during peak morning hours due to unindexed searches.	Keep this part prominent in Scene 1.
2 · What the team did to the system	They applied a non-clustered index patch and verified a full backup.	Ensure Carlos speaks louder during technical explanation.
3 · Figures remembered	Eighteen seconds delay dropped to half a second.	Nothing, metrics were clear.
4 · Words not understood	Concurrency peak was slightly rushed.	Enunciate clearly during Scene 2.
5 · Moment that lost attention	Transition between Scene 3 and Scene 4 felt a bit slow.	Speed up actor movement on stage.

6 · The single change suggested	Make eye contact more frequently with the audience during the demo.	Remind the demo driver to look up.
---------------------------------	---	------------------------------------

4. Staging decisions

We established the left side of the room as the coffee shop counter and the right side as the technical office. We will use a real laptop, a printed maintenance report folder, and an ID badge as props. Scene changes will be signaled by actors stepping across the center line while holding soft dialogue.

Establecimos el lado izquierdo del salón como el mostrador de la cafetería y el derecho como la oficina técnica. Usaremos una laptop real, una carpeta de informe de mantenimiento impresa y un gafete como utilería. Los cambios de escena se indicarán con los actores cruzando la línea central.

4.1 Open concerns

We need to make sure the classroom projector resolution fits our sandbox app layout perfectly and verify that microphone audio levels are adequate for all team members.

Debemos asegurar que la resolución del proyector del aula se ajuste perfectamente al diseño de nuestra aplicación de pruebas y verificar que el audio del micrófono sea adecuado.

5. Commitments before Presentation Day

TASK	WHO	BY WHEN
Finalize script v2 corrections in Word document	Sofía	Today
Export presentation deck to PDF and backup to USB	Carlos	Wednesday 16
Verify sandbox demo dataset for personal privacy compliance	Mateo	Wednesday 16
Conduct final dress rehearsal in the classroom	All team members	Wednesday 16
Print physical copies of the synchronisation sheet	Lucía	Friday 18

Presentation Day: Friday 18 September. Wednesday 16 is the dress rehearsal and the audit of documents and system.

Presentation Day: viernes 18 de septiembre. El miércoles 16 es ensayo general y auditoría de documentos y sistema.
